

VOTING INTENTIONS POLL

Published 1st July 2009

A poll was conducted by TNS-BMRB to establish current voting intentions in Scotland in relation to the Scottish Parliament, and to assess peoples' perceptions of the work of the Scottish Parliament in its first 10 years.

The results of this poll were published on stv on 1st July 2009.

TNS-BMRB is a member of the British Polling Council (BPC) and abides by its rules. We also operate within the Code of Conduct of the Market Research Society (MRS). In accordance with these rules the following information is provided:

Sample size	997
Sampling points	44
Fieldwork dates	23rd – 29th June 2009
Interview method	Face-to-face, in-home
Population sampled	All adults aged 18+ in Scotland
Sampling method	The poll was conducted through our Omnibus, Scottish Opinion Survey. For this survey, a sample of constituencies is selected to be representative of Scotland geographically and by party of current constituency vote MSP. Within each constituency, a quota sampling method is used for respondent selection.
Data weighting	Data are weighted to the profile of all adults aged 18+ in Scotland, based on population profile estimates from the National Readership Survey. Weighting is carried out in relation to working status within gender, age, social grade and electoral region. Unweighted and weighted bases are shown at the top of each computer table.
Voting intentions	Two tables are supplied for each measure of voting intentions. The first of these is based on all respondents and shows the percentages 'uncommitted' – i.e. who were either undecided, refused to say how they might vote or said that they would not vote at all. The second table excludes this 'uncommitted' group and re-percentages party support based on all those naming a party. It is these latter figures which are published as the measure of voting intentions. Results are shown for both the constituency and regional votes for Holyrood.
Questions	The data tables show the question wording in full
